BASANT SAADELDIN

Artificial Intelligence Engineer | LLMs & AI Agents | Generative AI

+20 150 460 0233 | basant.saadeldeen@gmail.com | github.com/BasantSaad | linkedin.com/in/basant-saad-eldin

PROFESSIONAL SUMMARY

AI Engineer and Machine Learning Engineer with strong foundations in machine learning, deep learning, generative AI, and software engineering. Experienced in building AI-powered applications using LLMs, RAG pipelines, and statistical modeling techniques for structured and unstructured data. Skilled in Python, PyTorch, Scikit-learn, FastAPI, and data visualization tools including Power BI and Tableau. Familiar with Big Data technologies such as PySpark and experienced in developing scalable AI solutions and APIs.

TECHNICAL SKILLS

ML & Statistics	Statistical Modelling, Hypothesis Testing, Regression, Classification, Supervised & Unsupervised Learning, Model Evaluation
Libraries & Frameworks	PyTorch, TensorFlow, Scikit-learn, Keras, SciPy, NLTK, Hugging Face, OpenCV, CLIP, Pandas, NumPy
Generative AI	LLMs, RAG, LangChain, LangGraph, OpenAI API, Prompt Engineering, AI Agents, Embeddings, Fine-Tuning
Big Data	Spark, PySpark, Spark MLlib, Hadoop (familiar), SQL, MySQL, Vector Databases
Visualization	Power BI, Tableau, Matplotlib, Seaborn, Streamlit
Backend & DevOps	FastAPI, Flask, REST APIs, Docker, Linux
Languages	Python, C/C++, MATLAB

PROFESSIONAL EXPERIENCE

AI Agents & LLMs Engineer · Orange Digital Center & D-Hub · Cairo, Egypt *02/2026 – 03/2026*

- Architected multi-agent systems using LangChain and LangGraph, automating 90% of manual email-sorting and API data-entry workflows.
- Built production RAG pipelines with vector database integration, delivering accurate Q&A over large volumes of unstructured enterprise data.
- Deployed an AI Assistant via FastAPI and Docker; presented performance analytics to senior stakeholders through structured reports.

Data Analysis AI Engineer · Orange Digital Center · Cairo, Egypt *01/2026 – 02/2026*

- Tested hypotheses and conducted EDA on 10,000+ record datasets using Python and Pandas, reducing manual processing time by 35%.
- Built 5+ Power BI and Tableau dashboards communicating actionable insights to senior management from raw structured data.

Generative AI Inern· NVIDIA & ITI · Mansoura, Egypt *11/2025 – 12/2025*

- Developed LLM applications using RAG and model fine-tuning to improve output accuracy on both structured and unstructured data.

SELECTED PROJECTS

Daily AI Analytics Pipeline · *Python, LangChain, PySpark, OpenAI API*

- Autonomous 4-stage pipeline (collection → transformation → LLM summarization → delivery) aggregating 7+ global AI news sources daily.

Sea Creature Classification – Vision-Language Modelling · *Python, CLIP, Scikit-learn, Streamlit*

- Replaced CNN baseline with CLIP; validated hypothesis that VLMs outperform pretrained CNNs on limited data — accuracy 63% → 93% (+30% precision).

SANAD – Arabic Voice AI Assistant · *Python, Flask, LLaMA-3.3-70B, XTTS v2*

- Full-stack bilingual (Arabic/English) voice app with STT, LLM inference, and TTS synthesis; dual-engine switching for seamless multilingual output.

EDUCATION & CERTIFICATIONS

B.Sc. Artificial Intelligence — Menoufia University
GPA: Excellent | Specialization: Intelligent System Engineering | Expected June 2026

Matsuo-Iwasawa Lab U-Tokyo
Bachelor of Science, Computer Science · (April 2026 - October 2026)

Google Cloud — *Introduction to Generative AI Learning Path Specialization*
Microsoft — MTA: *Introduction to Programming Using Python*
Stanford University — *Supervised Machine Learning: Regression and Classification*
IBM — *Data Analysis with Python*
IBM — *Machine Learning with Python*
IBM — *Developing AI Applications with Python and Flask*
IBM — *Python for Data Science, AI & Development*
